•Agency-Candidate Push Notification

Through Feature Upgrades, Candidates can Apply to, Refer, Tweet and monitor Jobs and Company Information whilst also delivering:
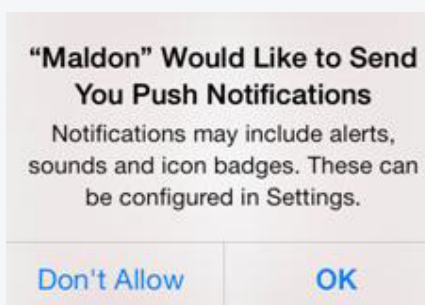

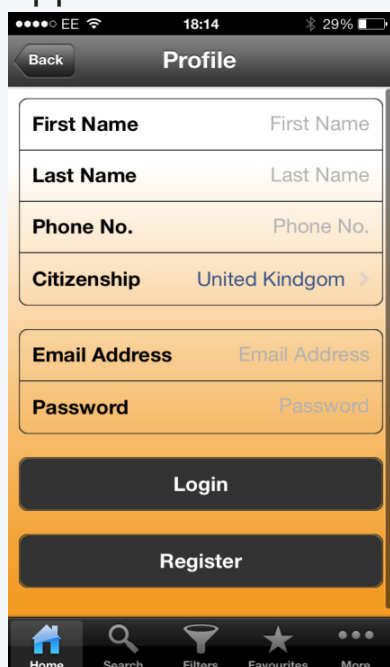

•Availability

•Timesheets

•Expenses

•CVs and further Documentation

•LinkedIn Profile

The Professional Profile & Effective Recruitment Push CMS Info

Candidates are able to create a finely tuned skills profile. This profile is alerted to any new position once posted through the agency system.

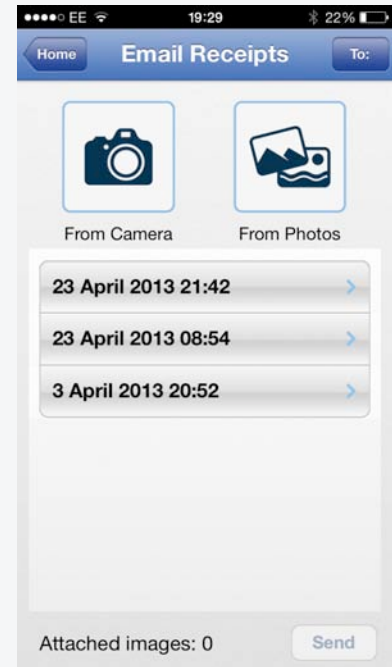

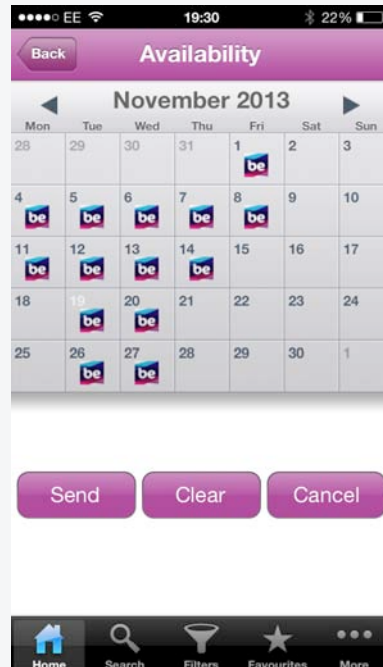

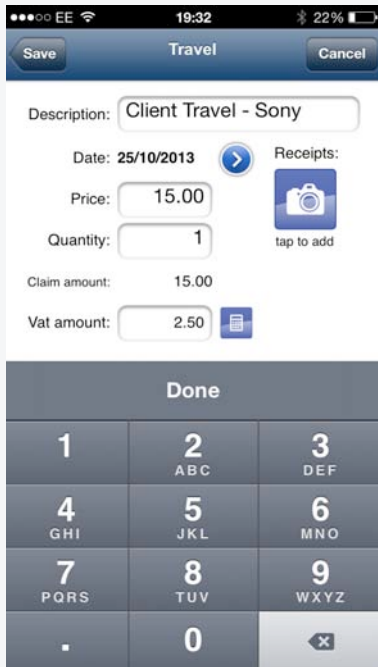

Agencies capture unique candidate information from new and existing professionals using the easy to use app registration, application and referral features.

Agencies have access to a personalised CMS. The Online CMS holds and shows details of all candidates that have accepted push notifications from the Agency Application. Personal or Grouped Mobile Recruitment Push Messages can be sent to Recruitment App users for further candidate engagement and influence.

Enhanced Candidate Engagement, Installs, Analytics and KeyApps

Candidates submit timesheets, expenses, availability on the move. Photo's can be attached and sent in a swift, clean action whilst also accessing all company information.
